Universal Health Insurance	**Prepared:** 15/11/ 2020

Project Name: Universal Health Insurance

Project Manager: Ghidaa Mohamed

Customer: patient.
Project Sponsor: director of Health Care, Quality of Accreditation and Health Insurance Authority.
Project Start/End (projected): 1/11/2020 – 24/12/2020.

Project Overview:
  universal health insurance is a mandatory social solidarity system that covers all citizens, and the state guarantees those who are unable. It provides high-quality health services. Within it the unit of coverage is the family and not the individual, it allows freedom to choose between any of the health service providers, whether in the governmental or non-governmental sectors .the mechanism for pricing medical services is determined in a fair manner that meets the quality standard.

Objectives:
1. Contributions include the family as a whole, not just the individual.
2. The subscribers provide health care, which includes checks and examinations, some surgeries and other high-quality analyzes and rays, in addition to the percentage of discounts on them.
3. It allows the subscriber to choose a hospital that is close to him or of high quality and that belongs to that system at reduced costs.
4. It provides patients with chronic diseases monthly medicines and dispensing medicines free of charge
5. Keep patient data confidential.
6. Motivates the most efficient doctors to increase their salaries.

Key Assumptions:
- Save medical history of patient.
- Treatment the patient of the unable is at the expense of the state.
- Increase doctor's salary.
- Provide medicines for chronic diseases all time.
